

Goal:

The goal of faith formation is to grow closer in our relationship with God. We want to grow in holiness, to be drawn closer to God. One of the ways to do this is to learn more about God and the wonderful things that He wants to share with us. We cannot grow in a relationship unless we learn more about the other person. The same is with God. In Faith Formation, we grow in our understanding the gift that God the Father has given us in the gift of God the Son and God the Holy Spirit. We learn more about God and his gift the Church so that we can grow in our understanding of those things which God wants us to believe so that we can one day be with God forever in our true home of heaven.

Guidelines:

Respect: Respect for yourself and the time you are taking to learn. Respect for your peers as they also are called to learn and grow in their relationship with God. Respect for your teachers who are helping to spread the faith. Don't underestimate the importance that the student and teacher can help each other. Respect God who made everything and wants so much for us to be with Him in heaven.

Do what is assigned. There will not be a lot of homework but what is given, please take it seriously and do it. We get out of something as much as we put in. If we don't try and work at something we can't expect to get something for nothing especially when it comes to learning and growing in holiness.

Tardiness. If for some reason you will not be able to make class or will be late, sickness or whatever, please let your teacher know.

Live the Faith: We have to live what we learn so practice those things you learn.

Ask questions. If you don't understand something, ask questions most especially of others, particularly parents.
